

## **Group Name-Web Development 10**

**1. Title of Project:** Alphabet encoding

### **2. Project Summary:**

Create own website on alphabet encoding , in this we have to encoded method and decodeit on receivers side using Key (without key user can't decode it. And key will be auto generated and shared in encoded message and not directly to receiver.

### **3. Technical Details of the Project:**

- ☐ Bootstrap is a free and open-source CSS framework directed at responsive, mobile-first front-end web development. It contains CSS- and JavaScript-based design templates for typography, forms, buttons, navigation, and other interface components.
- ☐ Html provides the basic structure of sites, which is enhanced and modified by other technologies like CSS and JavaScript.
- ☐ CSS is used to control presentation, formatting, and layout.
- ☐ JavaScript is used to control the behaviour of differ.
